

DO YOU HAVE FINE **RED** LEG VEINS?

If you have a patch of fine red blood vessels, also known as spider veins, less than 1 millimeter in diameter on your legs, you may be eligible to take part in a voluntary research study. Participants must be female, 18 - 65 years of age, in good health, who have not treated your leg veins in the past. *If you have any bulging veins and/or blue veins, then you are not eligible for this study.* Qualified participants will receive all study-related care with a laser device at no cost. Participants may even be compensated for time and travel. Health insurance is not required.
